

CDIC Dental is more than satisfied with the services of IT Partner. CDIC Dental turned to IT Partner for help with Internet Message Access Protocol migration to Exchange Online. The entire process was seamless and fast.

CDIC Dental recommends IT Partner's services to any and every company looking to implement Microsoft services or products. IT Partner's excellent customer service and their quick response time gave us the impression that they truly cared and were completely invested in our company's project. Michael and Oleg were very competent and knowledgeable in every aspect of the project. They were available to work with any time of day and were always able to answer any questions we had. The project was smooth and there were virtually no hiccups throughout the entire process. IT Partner lived up to their reputation as a Microsoft gold partner.

Sincerely,

Francis Nguyen
Operations Manager
