Re: E-mail system migration with data conservation

Dear Alex,

I wanted to start with a BIG thank you to *itpartner365.com* for the project they completed last week, especially for the Cloud Engineer i had the chance to work with during the migration.

We were looking for a company to migrate our email system and existing e-mail data from old public service to corporate communication – Office 365 business premium (exchange). Right after the first meeting we chose *itpartner365.com*. These guys answered all our questions, presented a migration plan and immediately got to work. We had some issues with our old public e-mail service as iello business was scaling up and so did our IT needs. They did a great job on helping us reach the next level in professionalism in our IT. The migration project was completed on time as promised and with no data loss which is a tough thing to achieve.

Now, we use a powerful and productive email and cloud storage solution from Microsoft. We used to have 3 different suppliers (email service, pro storage, and collaborative platform), we now have a single one, more reactive, more efficient system and partner and, the most important, making the ielodesign team a lot more productive !

The *itpartner365.com* team is composed of professionals with a passion for Microsoft technologies. They are client-oriented with exceptionally high standards in customer service. The greatest exemple would be that iello is Singapore based and yet, we chose *itpartners365.com* who is not local! They were just more professional and, let's say it, « better » than what the local market offers. It's not just about computers and technologies, it's about creating a competitive advantage and *itpartner365.com* understands this.

We definitely recommend *itpartner365.com* as a Microsoft Gold Partner company. They are pros and they know what they are doing.

Many thanks for the work done !

Romain Faye
